SUMMARY

Windows software developer with 2.5+ years of experience building standalone desktop utilities and automation tools in C# / .NET WinForms. Focused on system administration, Windows management, and remote IT support. Maintains several open-source tools on GitHub and provides remote support to clients via TeamViewer.

EXPERIENCE

Windows Desktop Developer

2022 — Present

Independent / Freelance

- Built 10+ standalone Windows utility tools targeting .NET Framework 3.5 – 4.8
- Developed tools for AV removal, CPU boost mode, Smart App Control, WinRE checker, and more
- Used WMI, Registry API, and PowerShell for deep Windows system integration
- Published and maintained open-source projects on GitHub (ThanhNguyenVN93)

Remote IT Support Technician

2022 — Present

Self-employed

- Provided remote desktop support to 100+ clients via TeamViewer
- Diagnosed and resolved Windows OS issues, driver conflicts, and software problems
- Automated repetitive IT tasks using PowerShell scripts

EDUCATION

Bachelor's Degree

2011 — 2015

NV University

- Information Technology

PROJECTS

AV Finder / Uninstall Tool

- Detects installed antivirus via WMI and runs vendor-specific removal tools with Safe Mode automation

CPU Boost Mode Tool

- Automates Windows Processor performance boost mode registry edits with

rollback safety

SAC-Check (Smart App Control Manager)

- Checks and toggles Smart App Control on Windows 11 via registry, with UI built in C# WinForms
